The diagram shows a class hierarchy. The base class, 'boost::statechart::event< EvWaypoint223 < TSource, TOrthogonal > >', is represented by a white box with a black border. It has two empty rectangular compartments below its name. The derived class, 'cl\_move\_base\_z::EvWaypoint223 < TSource, TOrthogonal >', is represented by a grey box with a black border. It has a compartment for its name, a compartment for its public attribute '+ waypointIndex', and an empty compartment at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.
