The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint108 < TSource, TOrthogonal > >`, is shown in a white box with a black border. It has two empty rectangular compartments below its name. The derived class, `cl_move_base_z::EvWaypoint108 < TSource, TOrthogonal >`, is shown in a gray box with a black border. It has a third compartment containing the attribute `+ waypointIndex`. A blue arrow with a hollow triangular head points from the derived class box to the base class box, indicating that `cl_move_base_z::EvWaypoint108` inherits from `boost::statechart::event`.
