The diagram shows a base class at the top and a derived class at the bottom. The base class is white with a black border and contains the text 'boost::statechart::event< EvWaypoint200< TSource, TOrthogonal > >'. The derived class is gray with a black border and contains the text 'cl_move_base_z::EvWaypoint200< TSource, TOrthogonal >' and a public member '+ waypointIndex'. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.
