

cl_move_base_z::pure
_spinning_local_planner
::PureSpinningLocalPlanner
::activate

```
graph LR; A["cl_move_base_z::pure  
_spinning_local_planner  
::PureSpinningLocalPlanner  
::activate"] --> B["cl_move_base_z::pure  
_spinning_local_planner  
::PureSpinningLocalPlanner  
::updateParameters"]; B --> C["cl_move_base_z::pure  
_spinning_local_planner  
::tryGetOrSet"]
```

The diagram illustrates a sequence of three method calls for the `PureSpinningLocalPlanner` class. The first box, which is shaded gray, represents the `activate` method. An arrow points from this box to the second box, which represents the `updateParameters` method. A second arrow points from the second box to the third box, which represents the `tryGetOrSet` method. All three boxes have a black border and contain text formatted to show the namespace and class structure.
