The diagram shows two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint252 < TSource, TOrthogonal > >`. It has two empty compartments below the name. The bottom box is gray and represents the derived class `cl_move_base_z::EvWaypoint252 < TSource, TOrthogonal >`. It has a compartment for the public member `+ waypointIndex` and an empty compartment below it. A blue arrow with an open triangle head points from the bottom box to the top box, indicating inheritance.
