The diagram shows a class hierarchy. The base class is `boost::statechart::event< EvWaypoint227 < TSource, TOrthogonal > >`, represented by a white box with a black border. It has two empty compartments below the name. The derived class is `cl_move_base_z::EvWaypoint227 < TSource, TOrthogonal >`, represented by a grey box with a black border. It has a third compartment containing the attribute `+ waypointIndex`. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.
